

Curso de Bioenergética

BioEnergetic medicine

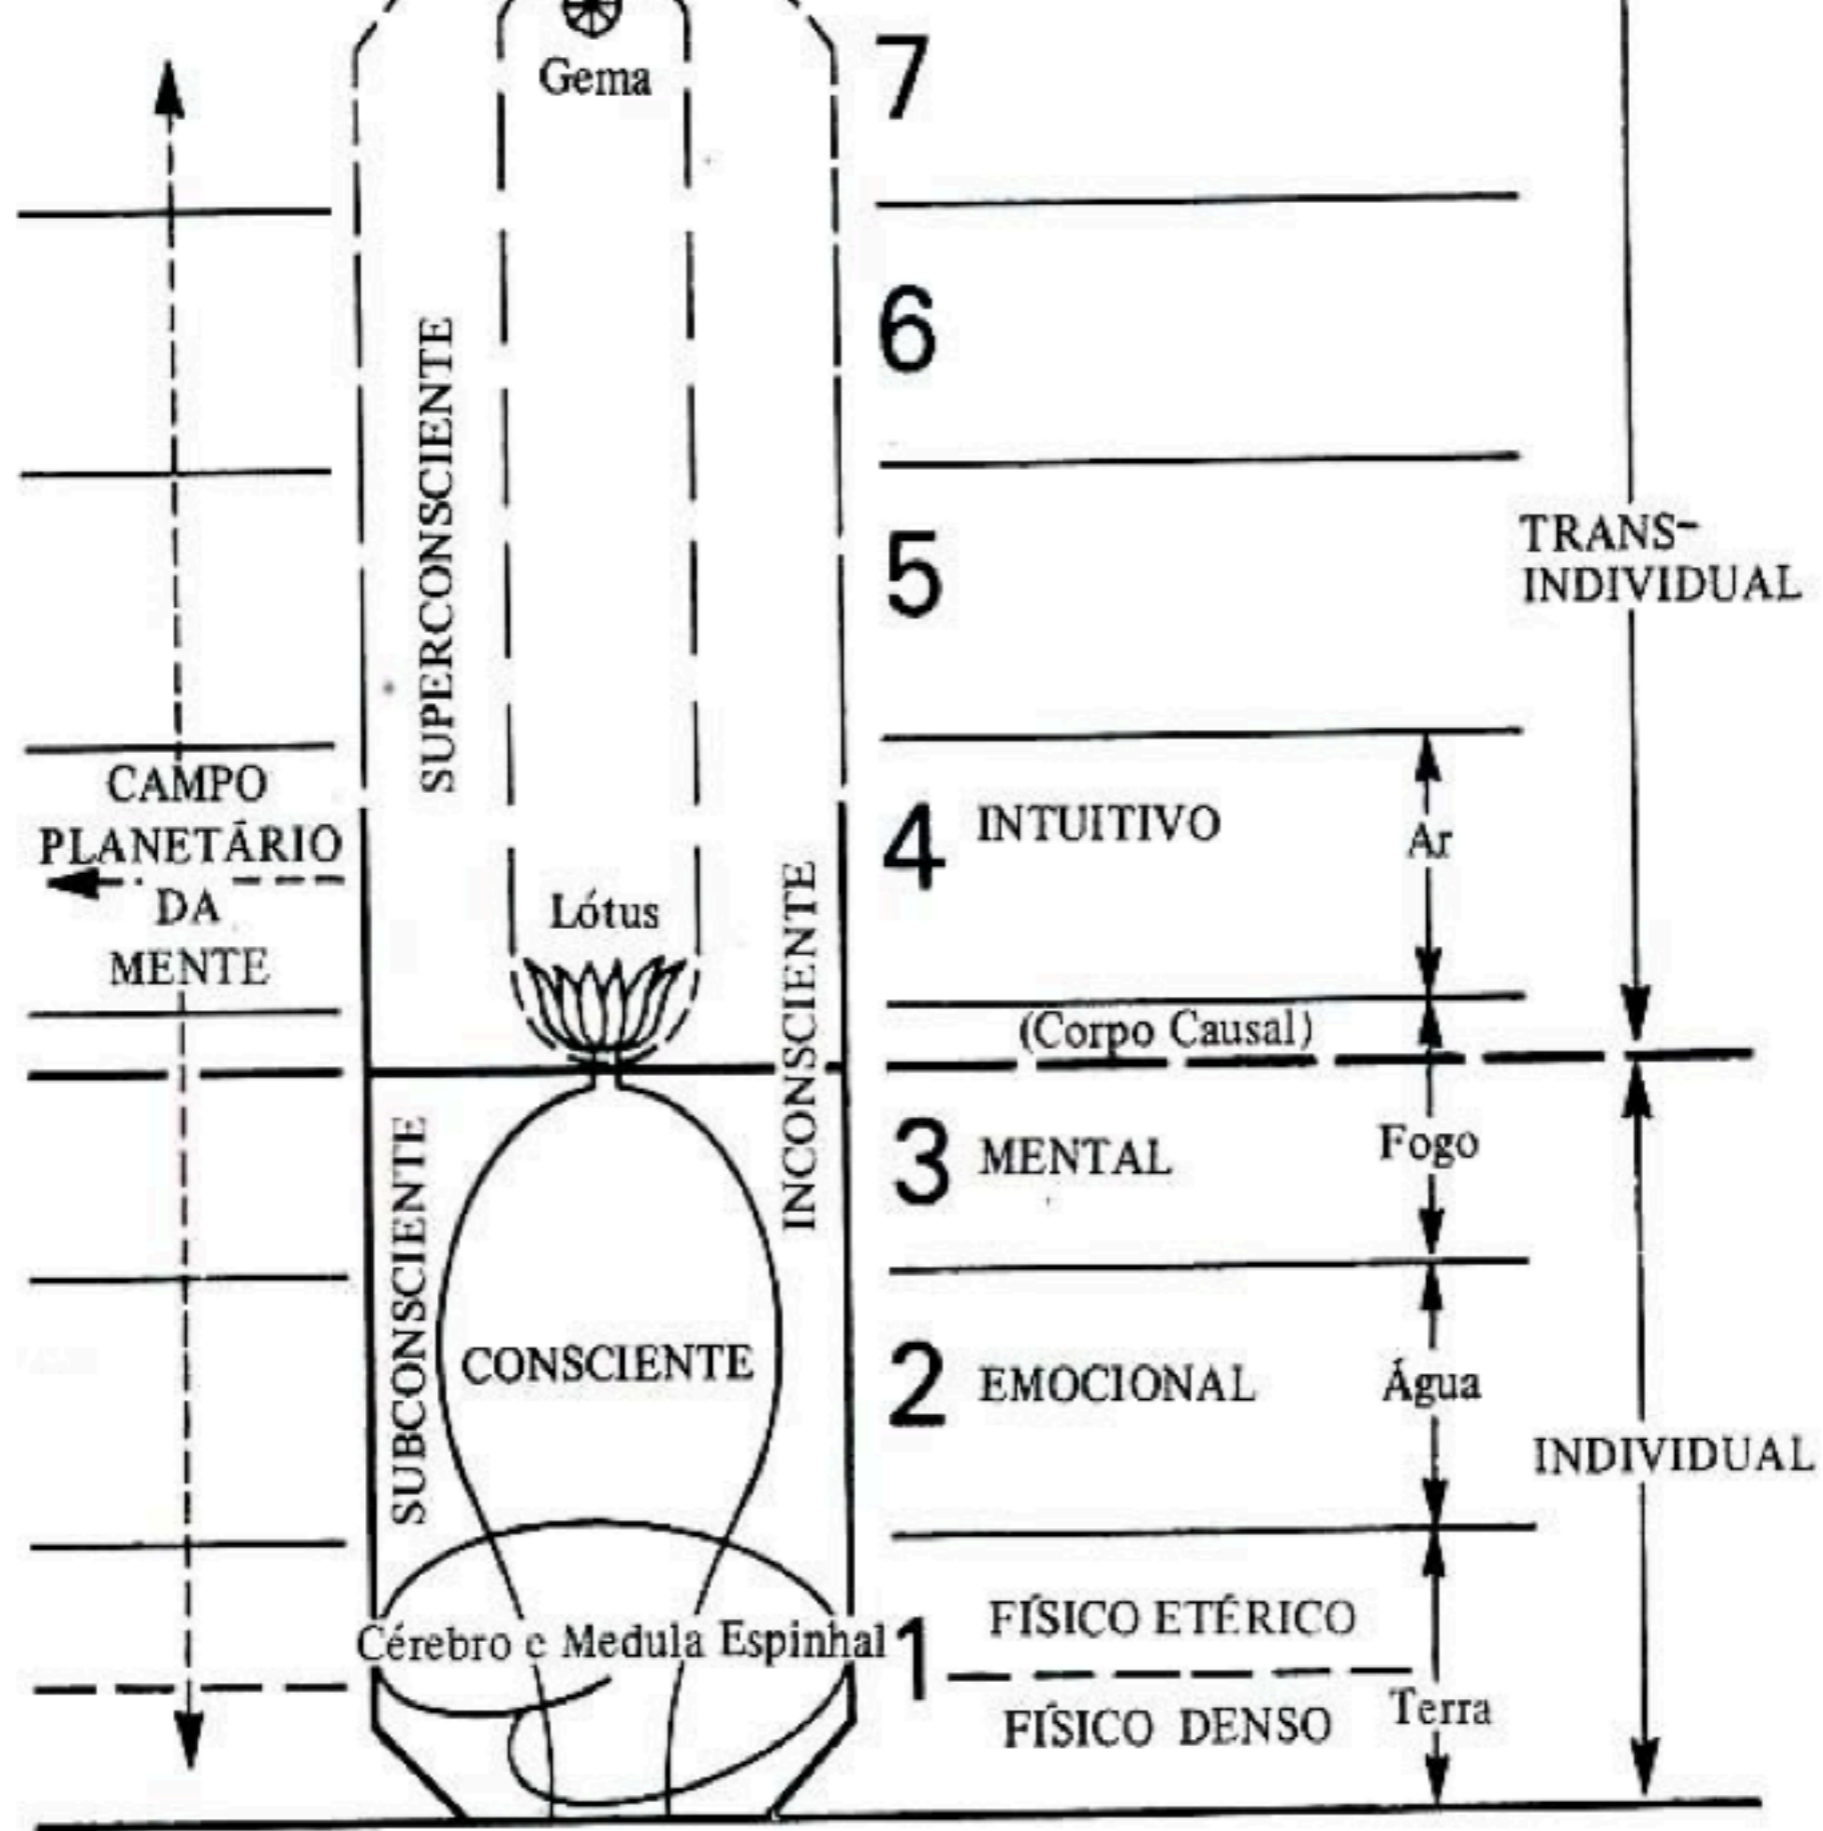

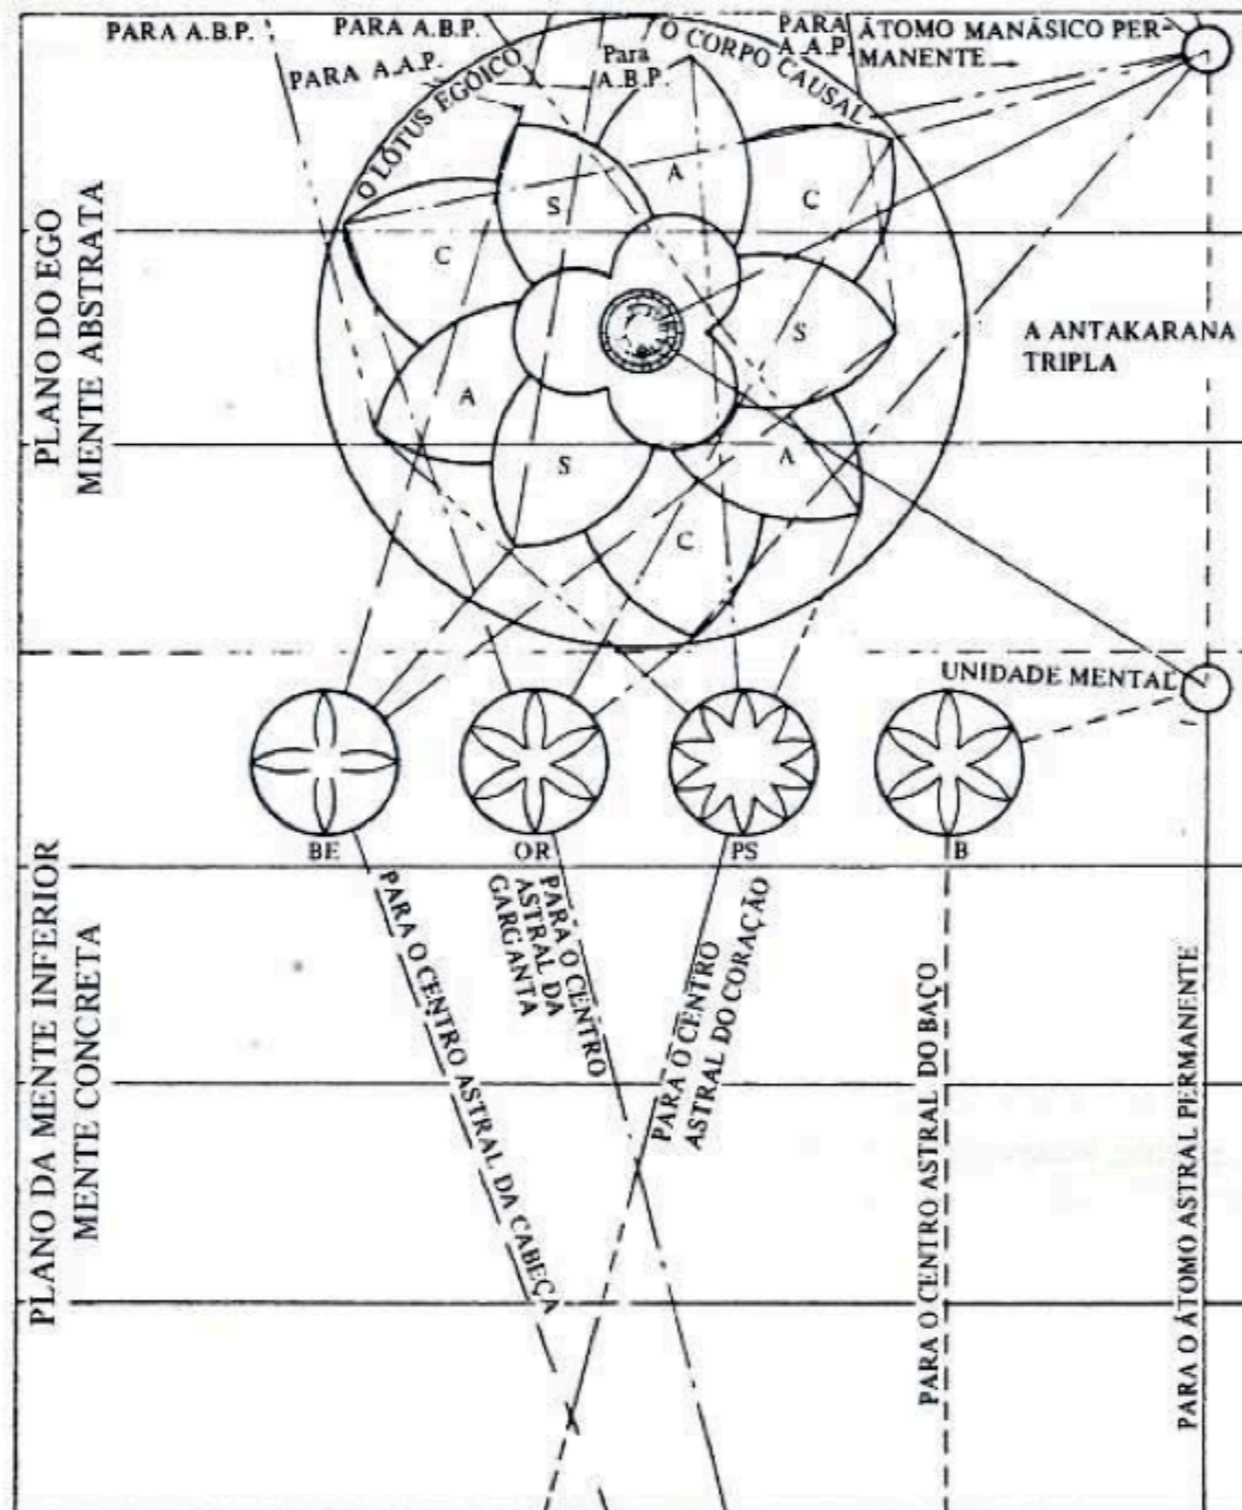

- Todo esta en constante movimiento
- Toda materia vibra u oscila.
- La oscilación de la materia produce frecuencias y resonancias moleculares.
- Las frecuencias y resonancias de la materia emiten y reciben información de su estructura
- En nuestro caso son producidas por las células, tejidos y órganos.
- Estas frecuencias emiten o reciben información con la que organizan la materia en campos energéticos diversos.
- Las bio-frecuencias y bio-resonancias moleculares pueden ser transformadas o alteradas como lo son las radiofrecuencias, modificando la información y por lo tanto modificando los campos energéticos de los que emanan.
